**5G COMPATIBLE**

WEBOOST PRODUCTS SUPPORT THE LATEST IN 5G TECHNOLOGY.

## A NEW STANDARD IN FLEET CONNECTIVITY.

The weBoost Drive X Fleet multi-user cell signal booster helps drivers and vehicles stay connected with dispatch from wherever the road takes them.

The weBoost **Drive X Fleet** is our standard multi-user, in-vehicle cell signal booster for fleet use; intended for law enforcement, government, first-responder, delivery, and commercial vehicles.

The Drive X Fleet is FCC approved and designed to boost cell signal coverage to support multiple users and devices simultaneously, on all available network speeds. By pairing the 12 V hardwire power supply with our high-performance NMO antenna, \* it reduces dropped calls, improves voice quality, boosts data speeds, increases streaming quality, and more with added reliability.

The weBoost Drive X Fleet is compatible with all phones (as well as cellular-based fleet tracking devices) and works on all U.S. carrier networks—including Verizon, AT&T, and T-Mobile.

\*REQUIRES PROFESSIONAL INSTALLATION

DRIVE X FLEET

473021

### Key Features

Our second most powerful booster, the Drive X Fleet is engineered to keep fleet drivers and dispatchers connected when it matters most.

Drive X Fleet offers better coverage and can reach far away cell towers at distances up to 33% farther than our Drive Sleek single-user vehicle booster.

Trusted by first responders, the Drive X Fleet is known for its reliability. It comes with both a 30-day money-back guarantee and a 2-year manufacturer's warranty.

Paired with an omni-directional NMO Antenna; permanently mounted to offer both durability and optimal cell signal coverage.

### SPECS

NAME	MODEL	USERS	BANDS	MAX UPLINK POWER	MAX DOWNLINK POWER	MAX GAIN	MSRP
Drive X Fleet	473021	Multiple Users	12/17 13 5 4 2	Up to 29.5 dBm	Up to 5 dBm	50 dB	\$479.99

### WHO IS MOST LIKELY TO USE THIS PRODUCT?

- Law enforcement departments in remote or rural areas
- Municipal firefighters or emergency medical personnel
- Installers or work crews for a telecommunication group
- Commercial home-delivery drivers at fulfillment hubs
- Construction or oil-and-gas workers at on-site locations

### IDEAL USE-CASE SCENARIO

For fleet managers and drivers in need of a cost-effective way to boost cellular coverage; helping them track vehicles and stay connected in weak signal areas.

### INSIDE THE BOX

All components needed for professional installation in one complete package. This includes:

1. Cleaning Wipe & O-ring Sealant
2. Velcro Strip
3. Extension Cable
4. NMO Antenna
5. Hole-drilling Protective Tape
6. Drive X Fleet Booster & Mounting Bracket
7. Slim Low-Profile Antenna
8. NMO Mount & Cable
9. Hardwire Power Supply
